ACADEMIC PROJECTS

Chabot

A Chabot has developed using python and its libraries which includes both voice to text and text to speech convertor**.** The initial stage of development was part of my internship and I am individually working on it to upgrade as an application to IOT.

Video Downloader

A tool was developed to download YouTube videos along with videos from various other web pages by simple copy paste or auto paste functionality.

Book Hiring Website

Developed a Website for hiring books along with selling of books with in an institution. It's currently being used by my college student community.

Home Automation

This project is the overall design of Home Automation System with low cost and wireless system. This system is designed to assist and provide support in order to fulfil the needs of elderly and disabled in home.
